

Specifications of spiral staircases in wood:

The stairs in question are custom-made from an outer diameter of 120 cm. to a maximum standard of 220 cm. The inner and outer bands are made of bent plywood. Angle, step and riser are optimized according to the specific situation; an anchor to guarantee rigidity is necessary at the half of the stair.

Steps: wood types on demand, closed riser available.

Finishes: the product is suitable for the widest customization, the bands can be in RAL lacquered finish or mural made or entirely of wood, the treads can also be finished in the sample.

Railings: painted steel, satin stainless steel, wood.
